PIZZA SALES ANALYSIS

HELLO!

Hi, I'm Shagun Singh.

I built this Pizza Sales Analysis project using SQL to enhance my data analysis skills. Through this project, I explored pizza sales data and answered several business questions by applying SQL concepts like joins, aggregate functions, and clauses such as WHERE and HAVING.

SQL CONCEPTS USED

🔍 Database & Table Creation

- ✅ Joins (INNER JOIN)
- ✅ Aggregate Functions (SUM, COUNT, AVG)
- ✅ WHERE Clause
- ✅ GROUP BY
- ✅ HAVING Clause
- ✅ ORDER BY
- ✅ Subqueries

BUSINESS QUESTIONS SOLVED (QUERIES + OUTPUT)

RETRIEVE THE TOTAL NUMBER OF ORDERS PLACED

```sql
-- Retrieve the total number of orders placed.
SELECT COUNT(order_id) FROM orders;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

COUNT(order_id)
1333

CALCULATE THE TOTAL REVENUE GENERATED FROM PIZZA SALES

```sql
-- Calculate the total revenue generated from pizza sales.
SELECT Round(sum(orders_details.quantity * pizzas.price),2) as total_sales
FROM orders_details  JOIN pizzas
on pizzas.pizza_id = orders_details.pizza_id;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

total_sales
12025.55

IDENTIFY THE HIGHEST-PRICED PIZZA

```sql
-- Identify the highest-priced pizza.
SELECT pizza_types.name, pizzas.price
FROM pizza_types JOIN pizzas
ON pizza_types.pizza_type_id = pizzas.pizza_type_id
ORDER BY pizzas.price DESC LIMIT 1 ;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content: | Fetch rows:

name	price
The Greek Pizza	35.95

IDENTIFY THE MOST COMMON PIZZA SIZE ORDERED

```sql
-- Identify the most common pizza size ordered.
SELECT pizzas.size, COUNT(orders_details.order_details_id) as order_count
FROM pizzas JOIN orders_details
ON pizzas.pizza_id = orders_details.pizza_id
GROUP BY pizzas.size ORDER BY order_count DESC;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

size	order_count
L	279
M	238
S	185
XL	9

JOIN THE NECESSARY TABLES TO FIND THE TOTAL QUANTITY OF EACH PIZZA CATEGORY ORDERED

```sql
-- Join the necessary tables to find the total quantity of each pizza category ordered.
SELECT pizza_types.category,
SUM(orders_details.quantity) AS quantity
FROM pizza_types JOIN pizzas
ON pizza_types.pizza_type_id = pizzas.pizza_type_id
JOIN orders_details
ON orders_details.pizza_id = pizzas.pizza_id
GROUP BY pizza_types.category ORDER BY quantity DESC;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

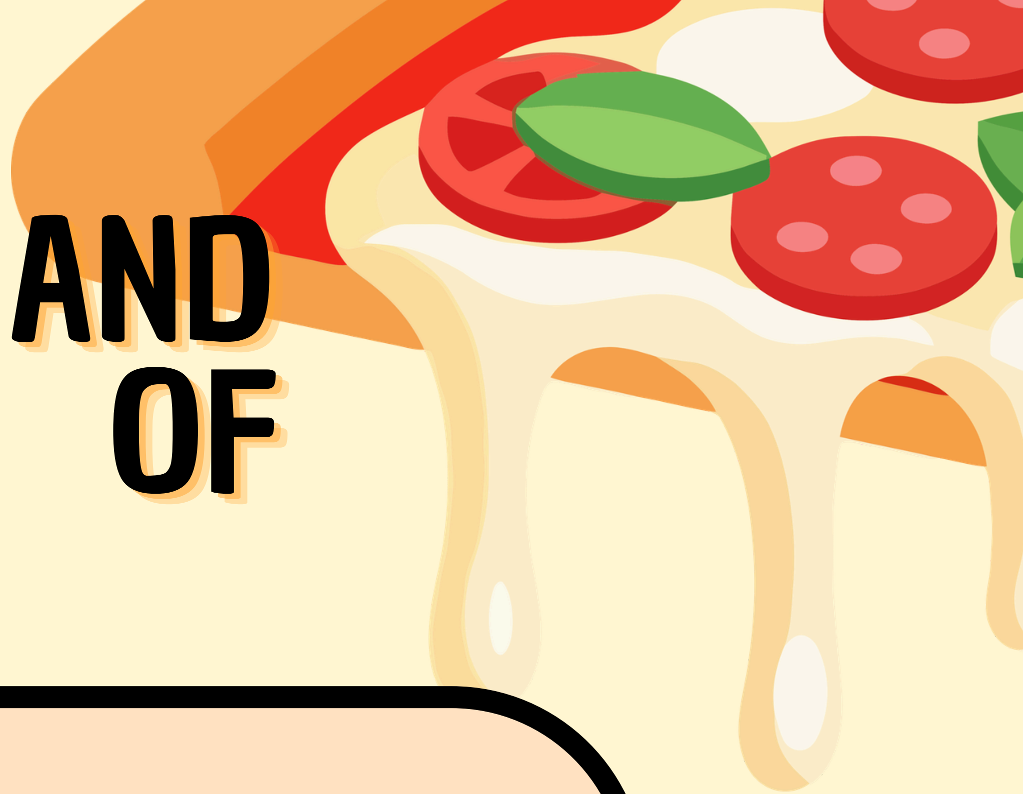
category	quantity
Classic	226
Supreme	186
Chicken	160
Veggie	156

DETERMINE THE DISTRIBUTION OF ORDERS BY HOUR OF THE DAY

```sql
-- Determine the distribution of orders by hour of the day.
select hour(order_time) AS hour, count(order_id) AS order_count FROM orders
group by hour(order_time);
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

hour	order_count
11	74
12	168
13	142
14	114
15	101
16	114
17	150
18	143
19	129
20	96
21	62
22	39
23	1



GROUP THE ORDERS BY DATE AND CALCULATE THE AVERAGE NUMBER OF PIZZAS ORDERED PER DAY

```sql
-- Group the orders by date and calculate the average number of pizzas ordered per day.
SELECT round(avg(quantity),0) FROM (
SELECT orders.order_date, sum(orders_details.quantity) AS quantity
FROM orders JOIN orders_details
ON orders.order_id = orders_details.order_id
GROUP BY orders.order_date ) AS order_quantity;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

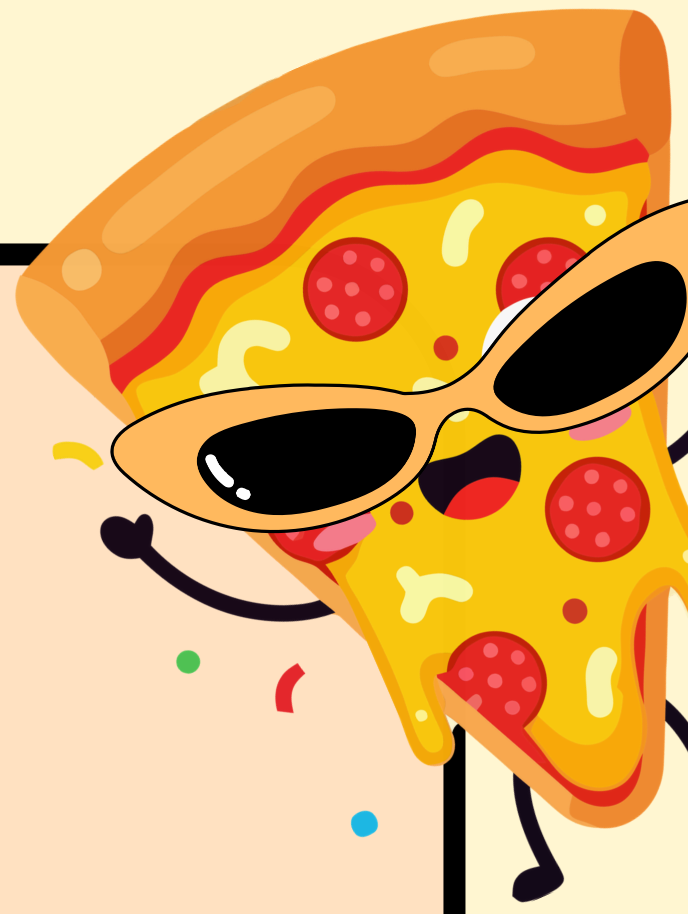
round(avg(quantity),0)
69

DETERMINE THE TOP 3 MOST ORDERED PIZZA TYPES BASED ON REVENUE

```sql
-- Determine the top 3 most ordered pizza types based on revenue.
SELECT pizza_types.name, SUM( orders_details.quantity * pizzas.price ) AS revenue
FROM pizza_types JOIN pizzas
ON pizzas.pizza_type_id = pizza_types.pizza_type_id
JOIN  orders_details
ON  orders_details.pizza_id = pizzas.pizza_id
group bY pizza_types.name ORDER BY revenue DESC limit 3;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content: | Fetch rows:

name	revenue
The Barbecue Chicken Pizza	663
The Italian Supreme Pizza	646
The Spicy Italian Pizza	584.75



WHAT I LEARNED

- ✔ Writing complex SQL queries
- ✔ Working with relational databases
- ✔ Data extraction and analysis
- ✔ Generating business insights from data
- ✔ Problem-solving using SQL

THANK YOU
